

# Recognize scabies

*It's in everyone's interest*

Itchy?

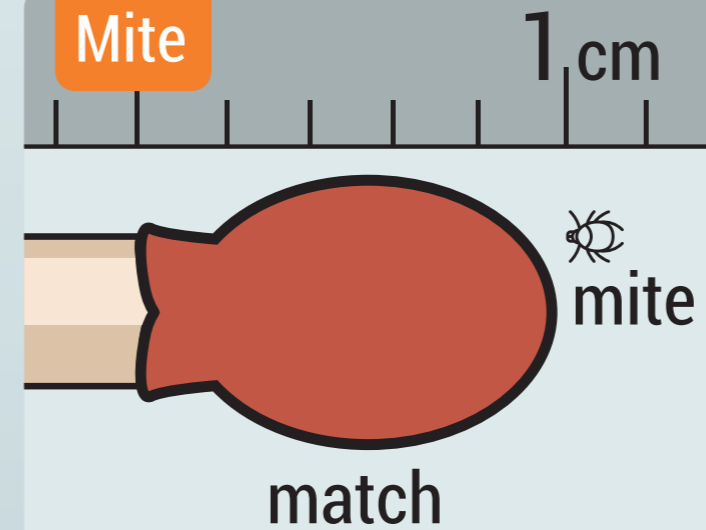

Do you have an itch? It could be scabies. Do you think you could have scabies? Go to the GCA.

Recognize scabies

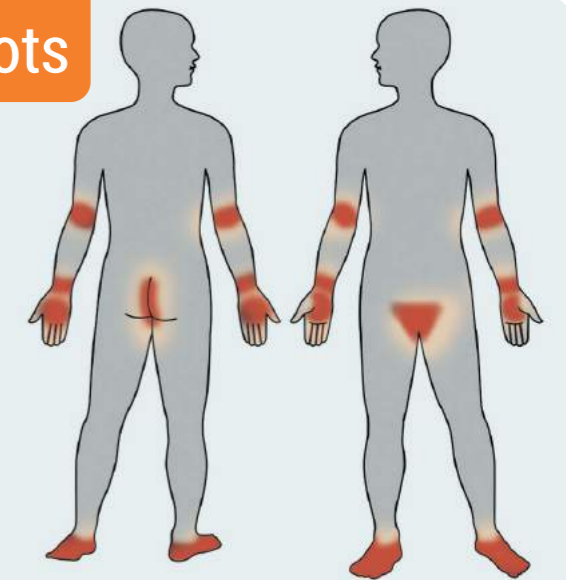

Scabies looks like this. Red spots which are itchy.

Mite

The mite that causes scabies is very small, too small to see.

Spots

This mite will live (and lay eggs) on the warm spots of your body. So scabies will be most likely found here.
